PROFESSIONAL SUMMARY

Economics graduate (magna cum laude) with 3+ years across data analysis, administrative support and editorial work. I clean, check and report data, build trackers and dashboards that decision-makers can act on, and manage schedules, records and correspondence with care. Two years as lead feature editor taught me to write clearly and catch errors early. I work well remotely across time zones, flag issues early and pick up new tools quickly.

CORE SKILLS

DATA AND REPORTING	Data cleaning and validation, KPI and financial trackers, budget-versus-actual checks, dashboards, summary reports
ADMINISTRATIVE	Scheduling, correspondence, records management, filing, documentation, event logistics
WRITING	Writing and editing, proofreading, fact-checking, plain-language reports, status updates and handovers
TOOLS	Excel, Google Workspace, Microsoft Office, Power BI, Tableau, SQL, Python, R, Stata, Canva, GitHub Pages
LANGUAGES	English (full professional proficiency), Filipino (native)

EXPERIENCE

Data Analyst Jan 2026 – Apr 2026

Department of Agriculture (Philippines)

- Cleaned and reconciled household records across baseline, program and historical datasets so the figures matched across sources.
- Checked beneficiary and demographic data against source records before computing project KPIs and impact indicators.
- Prepared summary tables comparing baseline and program results for project review.

Data Analyst Intern Aug 2025 – Oct 2025

Socio-Economic Research and Data Analytics Center

- Checked datasets for consistency and kept research documentation current for internal review.
- Cleaned demographic data and produced charts, summary tables and Excel dashboards.

Business Insights Analyst Oct 2024 – Dec 2025

Freelance

- Built and maintained revenue, expense and sales-funnel trackers with monthly budget-versus-actual checks.
- Combined marketing and sales data from several sources into consistent KPI dashboards that showed where to move budget.
- Wrote short review summaries that turned business figures into clear next steps for owners.

Econometrics and Applied Economics Research Analyst Aug 2024 – Jan 2026

University of Southeastern Philippines

- Researched and organized sources and data for applied economics studies.
- Checked statistical outputs with diagnostic tests and wrote up the findings as plain-language reports.

Lead Feature Editor Aug 2022 – Aug 2024

The Collegiate Headlight, USeP

- Wrote, edited and checked 100+ published pieces for accuracy, grammar, style and sourcing.
- Coordinated deadlines, layout cycles and revisions across a team of writers and editors.
- Mentored junior writers on structure, fact-checking and clear writing for non-technical readers.

Administrative Assistant Aug 2020 – Apr 2022

Saint John Marie Vianney Academy of Sulop, Inc.

- Managed schedules, correspondence and internal reports for school operations.
- Kept accounting logs, class records and school-wide filing complete and easy to retrieve.
- Supported event logistics and documentation, and produced 50+ operational and communication materials.

SELECTED PROJECTS

E-commerce Customer Retention Analytics. Cohort analysis and segmentation of 93,358 Olist marketplace customers in Python, with Tableau dashboards; found 59.1% churn and a 14.0% at-risk group to target first. *Python, Pandas, Tableau*

AI Customer Churn Intelligence System. Churn model with SHAP explanations and Power BI reporting; customers it rated High Risk churned at 78.8%, against 12.9% for Low Risk. *Python, scikit-learn, SHAP, Power BI*

CRM & Event Marketing Data Hygiene System. Cleaned 1,500 CRM records into 1,187 unique contacts, removed 313 duplicates, flagged 469 invalid emails and readied 310 referrals for follow-up. *Excel, Power Query, Python, Pandas*

FP&A Revenue, Cost & Expense Forecasting Dashboard. Monthly budget-versus-actual reporting on $281.6M in revenue with 98.2% forecast accuracy and 369 anomalies queued for review. *Excel, SQL, Python, Streamlit*

CARP and Agricultural Productivity: A Synthetic Control Study. Co-authored evaluation of the 1988 agrarian reform; Philippine farm labor productivity ran about 18.2% below its synthetic control from 1989 to 2008. *R, R Markdown*

All twelve projects, with figures and code: liancataytayjk-coder.github.io
