

PORTFOLIO

Lian Cataytay

Data Analyst & Economist

Decision-ready analytics, dashboards, and research workflows built with an economist's lens.

Lian turns raw datasets into clear, explainable outputs for business, policy, and people decisions. His work spans econometrics, business intelligence, machine learning, customer analytics, credit risk, workforce intelligence, and applied research.

Based in the Philippines

PROFILE

Analytics for better decisions

Lian is a data analyst and economist from the Philippines. His work spans econometrics, business intelligence, and machine learning. He has built projects involving retention analytics, AI-powered churn prediction, banking risk analysis, and workforce intelligence.

Data is only valuable when it leads to better decisions. Many organizations already have the numbers; what they lack is a clear way to interpret them. That is the gap he focuses on closing.

Right now, he is especially interested in research and AI, with a focus on making analytics practical, explainable, and useful to decision-makers.

01

Business Intelligence

Dashboard-ready KPIs, stakeholder reporting, performance views, and decision-focused metric design.

02

Econometrics & Research

Time-series analysis, ARDL/ECM modeling, correlation analysis, diagnostics, and policy-facing summaries.

03

Machine Learning

Classification analytics, churn-risk scoring, explainability with SHAP, feature importance, and model interpretation.

04

Data Storytelling

Clean analysis narratives that connect methods, findings, business implications, and next steps.

FEATURED WORK

Customer and retention intelligence

NLP · SENTIMENT ANALYSIS · BUSINESS INTELLIGENCE

Customer Sentiment Intelligence Dashboard

Sentiment analysis of customer reviews and business-facing metrics for interpreting customer pain points and satisfaction trends.

- TOOLS
- Python, Power BI, Pandas, NLP workflow
- FINDING
- Highlighted recurring pain points and satisfaction trends that could support retention and product improvements.

CUSTOMER ANALYTICS · RETENTION · SEGMENTATION

E-commerce Customer Retention Analytics

Customer behavior analysis focused on retention, segmentation, cohort patterns, and churn-risk insights.

- TOOLS
- Python, Pandas, Tableau, Cohort analysis
- FINDING
- Revealed clear differences between high-value loyal customers and segments showing stronger churn behavior.

MACHINE LEARNING · EXPLAINABILITY · CHURN RISK

AI Customer Churn Intelligence System

An explainable churn-prediction workflow using machine learning, SHAP, and retention-focused reporting.

- TOOLS
- Python, scikit-learn, SHAP, Power BI
- FINDING
- Identified high-risk customers and showed that contract type, pricing, and service usage influenced churn risk.

Economics, productivity, and labor analysis

AGRICULTURAL ECONOMICS · SCM · PRODUCTIVITY ANALYSIS

Agricultural SCM Productivity Analysis

A research-style analysis exploring how supply-chain management practices relate to agricultural productivity outcomes.

TOOLS R, R Markdown, Correlation analysis, Productivity indicators

FINDING Suggested meaningful relationships between SCM practices and productivity indicators like labor and land productivity.

LABOR ECONOMICS · TIME-SERIES TRENDS · POLICY INSIGHT

Philippines Labor Market Trend Analysis

A labor-market analysis of employment quality, workforce composition, and underemployment patterns in the Philippines.

TOOLS Python, Pandas, Time-series analysis, Excel

FINDING Highlighted shifts in employment quality, workforce composition, and underemployment patterns.

Philippine Emigration ARDL Macroeconomic Analysis

An econometric analysis of how macroeconomic conditions relate to Philippine emigration trends.

TOOLS	Stata, ARDL bounds testing, ECM modeling, Time-series diagnostics
FINDING	Identified both short-run and long-run relationships between macroeconomic variables and emigration.

Risk, workforce, and engagement intelligence

MEDIA ANALYTICS · ENGAGEMENT · DESCRIPTIVE REPORTING

Media Audience Engagement Analysis

An audience analytics project examining engagement patterns across media and content performance data.

- Excel-based analytics and visualization reporting
- Showed noticeable engagement differences across content and reporting patterns

BANKING ANALYTICS · CREDIT RISK · FINANCIAL PERFORMANCE

Banking Risk and Financial Performance Analysis

A financial-risk project identifying borrower and loan characteristics associated with default exposure.

0.72 ROC AUC

Default exposure model

HR ANALYTICS · ATTRITION RISK · WORKFORCE INTELLIGENCE

Employee Attrition Risk and Workforce Intelligence Analysis

A workforce intelligence project identifying employee groups and teams with stronger attrition-risk patterns.

Risk Hotspots

Team-level retention signals

Available for data analysis, business intelligence, research, and AI-assisted analytics work.
